## Teacher Remarks

1. The workshop was worthwhile and we improved practical skills. This will help us to be able to guide and assist the learners when they will be using the Mylab.

2. It was a fantastic experience to be in such an interesting science workshop. We enjoyed ourselves and also gained a lot of information and knowledge on how to do experiments with our learners.

3. Everything was good. We loved improving our skills and we will be able to teach our learners what we have seen and learned.

4. If you continue with this programme, many teachers will be empowered to do experiments in labs. The small kits enable even poor schools to afford apparatus and thus empowering the underprivileged South African learners who live in squatter camps. I enjoyed and loved every experiment.

5. Thank you; it was a nice experience. If it is possible we should come every beginning of the term. Please keep the good work up.

6. The workshop is very useful. I personally feel that all underprivileged schools which do not have laboratories should consider the use of MYLAB. The good thing is, that it is also CAPS orientated that makes science teaching an easy task.

7. MYLAB apparatus and chemicals are easy to use and learners can handle them very easy and be able to see results immediately. All the apparatus and chemicals are packed in one box, which makes it easier to store, for learners to use in groups and to do any practicals prescribed in the curriculum.

8. The workshop was enriching and developed my practical skills in the lab. I will therefore be able to do experiments with learners with confidence. The knowledge I have acquired will also benefit me as I am also studying.

9. I am very much impressed and empowered.

10. Practical were precise, clear and time saving; simple for learners and teachers to follow and enhanced learning in a deep and profound way.

11. An eye opening workshop. It closed the gap that lacked in my teacher training.

12. The workshop was very good in a sense that we learned to use apparatus and also gained confidence to use them.
