

North-West University – Mylab Project

Mylab Workshop

North-West University Potchefstroom Campus gr 4 to 7 Teachers

22 November 2014

N = 3

Workshop evaluation (post workshop)

Question	yes	no	both
Have you worked with the MYLAB kits before?	-	3	-
Could you follow the instruction?	3	-	-
Was it easy to handle the apparatus?	3	-	-
Did the workshop live up to your expectations?	3	-	-
What went wrong?	Nothing		
How can we improve the workshops?	I think the workshop gives a sufficient overview of everything you need to know.		
What are the objectives of this workshop?	To introduce the different apparatus pieces by using short experiments. To show teachers how to use the MYLAB kit.		
How was the work done in the workshop relevant to your teaching?	It covers a lot of the learning outcomes of the learners. 100% - what a fun and interactive way to learn.		
How did the workshop activities stimulate your learning?	The theory can be presented in a practical way. So excited to learn more and to share learning/knowledge with my pupils.		
Did the activities in this workshop give you sufficient practice and feedback?	Yes (3)		
Was the workshop tempo too fast or too slow?	Just fine (1) Perfect (2)		
Evaluate the organization of the workshop.	Very good Great Good		
Evaluate the presenters of the workshop.	Excellent Thank you Marie for your wonderful knowledge and passion for learning Very good		
Evaluate the apparatus of the workshop.	Very good Fantastic – very innovative Very good		
Evaluate the atmosphere of the workshop.	Great Good Great fun, informative and engaging		
Evaluate the experiments done during the workshop	Experiments were very interesting Fantastic Very good		
We would like to hear your remarks:			
The workshop was excellent. Very interesting. The workshop makes you want to teach. The kit is also user friendly.			
I wish my "science education" had been "MYLAB" based. I would have understood more and enjoyed it in the process. In terms of our South African schooling environment, I think that this is a great opportunity for scholars to learn and be exposed to this topic.			
I enjoyed the workshop and learned a lot. It was very interesting.

Subject: Thank you

Dear Marie

Thank you for sparing few hours of your time to train me on using My Lab kit. The day was so special to me and I hope to impart the knowledge to others teachers in our region.

Thank you so much.
Lungile Singo
